theaquascaper

The Aquascaper range of aquariums was developed in collaboration with the UK's best known aquascaper, George Farmer. Designed for freshwater hobbyists who are looking for a beautiful aquarium to house their aquascaping creations.

The combination of the finest low iron glass, high polishing techniques and near perfect silicone work come together to provide a nearly invisible tank which will enhance and highlight the aquascape within it.

theaquascaper

All aquariums are available either on their own or with the cutting edge 16 colour cabinet range as available with all Evolution Aqua aquariums. The Aquascaper cabinets will come with the all-important cut outs in the side panels for filter hoses, CO2 hose and lighting cables.

Model	W cm	H cm	D cm	Litres	Cabinet
